buildings

ROUNDHOUSE HO GAUGE SCALE MODEL

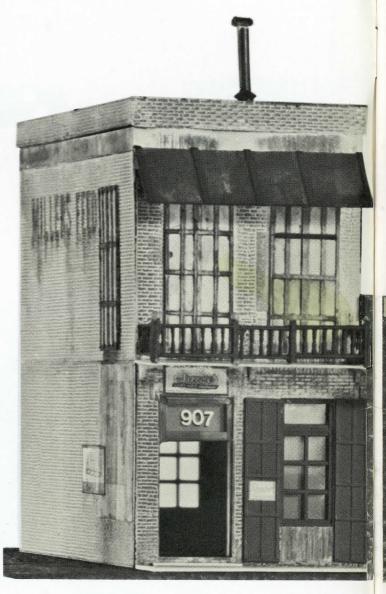

WHY MODEL RAILROADING? First, it is a source of pleasure from the first kit you assemble on through the many paths you may take in building and operating a layout-large or small, simple or complicated. Beyond that, it can be enjoyed alone, with others who share your interest, as a bridge between adult and child-any, or all of these. You may even develop a secondary hobby as a result of your interest in Model Railroading. The scope of this hobby includes photography, engineering, electronics, painting, carpentry and many other such fields. You may wish to join a local club among whose members may be airplane pilots or accountants, business men or lawyers, doctors or railroad engineers, plumbers or mechanics -these men are alike in their enthusiasm for the hobby.

Model Railroading is an expanding, active hobby with such a variety of products and facets that you need never outgrow it. We at Roundhouse have been making model railroad kits for over 25 years, and from the beginning, have established PRECISION IN REPRODUCTION as our standard from the first engineering drawing through many months of cutting fine detail into steel molds, so that the final production yields a model which we are proud to have carry our name.

New for '73, Roundhouse Products proudly presents our H-O Scale "Old Timer" building line.

- Injected molded plastic / for years of lasting beauty.
 - Modular construction / ease of freelance designing.
 - Super extra individual detailing parts / no two buildings alike.
 - Space saving size / will fit any layout (large or small).

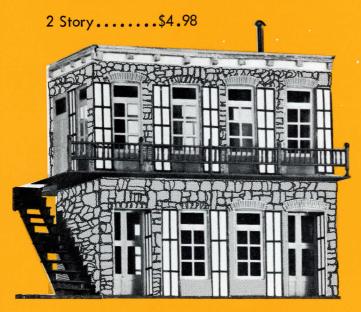

HO SCALE MODEL OLDTIMER BUILDING SERIES

The West comes alive again through the scale model buildings of Roundhouse Products' "Old Timer" Series. Each model building in our new series is detailed directly from buildings discovered in the California Mother Lode gold country. No expense has been spared in bringing to you, the discriminating modeler, buildings correct in every minute detail. Each kit is produced from precision engraved dies, hand executed, down to the finest scale bricks and authentic working iron door shutters.

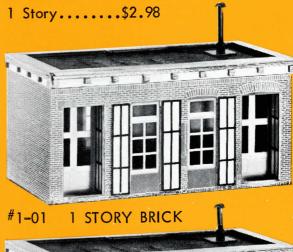

Each building in this series was designed on what we call "modular construction". With this series you can recreate any and all of those fascinating Gold Rush era buildings. Each kit contains an individually designed structure. By purchasing our different styles, you can combine them and, either by substitution of ends or sides, give your buildings your own character and charm. As an example, Roundhouse is producing two of the most sought after styles — stone wall and brick wall buildings. All you need is one of each to complete a mixed style; or combine the two, one on top of the other, for a two-story building. As you can see, we truly have gone one step further with our buildings. Just look over the items in our catalog and imagine what you can do without all that cutting and filing you used to have to do.

Roundhouse has taken the work out and put in the real fun!!

*NOTE! Pictures of "OLD TIMER" Buildings were from die samples; closely approximating details in our final kits. Release date early Spring.

#2-02 2 STORY STONE

#1-02 1 STORY STONE

#2-01 2 STORY BRICK

This Diesel is the original, first 60 ton, 300 horse power box-cab, as collaborated and built by American Locomotive Works, General Electric, and Ingersoll-Rand Co. This is a sturdy built model designed for years of trouble free operation, long lasting looks. The one piece body is molded of high-impact styrene, pre-painted and authentically lettered in 12 roadnames. Model is complete with couplers & separate attaching super detailing castings. Model is powered by a powerful 5 pole permanent magnet in-line motor (The same power as used on the most expensive imported locomotives.) All four axles are powered, giving this little giant rear pulling power! Designed for any type of track, home or club.

\$300_{ea}.

Box Car Red

Black

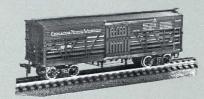

Each stock car is individually lettered and painted from official railroad prototype data.

These kits are complete with easy attaching hardware, plus additional detailing parts. You can produce many variations as found throughout the country on the prototype cars at the turn of the century. Individual metal grab irons and three plastic cast ladders, superdetailed doors and two types of early door guides and complete truss rod details are included with each kit. A cast metal underframe guarantees these stock cars to have unequalled rolling qualities, low center of gravity and correct weight without using extra pieces and hidden weights.

T-266 Union Tank Line

Like the other "Old Timer" box cars, stock cars, reefers and tank cars we have been bringing out during the past year, these cabooses are easy to assemble, without any cutting or fitting needed. The engraved steel dies used in making these molded bodies provide the fine details and overall quality that makes them so realistic in appearance. Cars are prepainted, with a contrasting roof, and lettered in a variety of road names. All attaching hardware is furnished, including grab irons, ladders, truss rods, old style roof top lantern, plus many others make this an outstanding, beautifully authentic model. Period trucks, with perfect rolling qualities that make operation a pleasure, are included in every kits. \$3.75 ea.

SIDE DOOR, BLIND END C-20 Unlettered

C-200 Series represents one of the earliest styles of cabooses. Originally old box cars had windows and doors cut into their sides; this car is an out growth of such cars.

SIDE DOOR, OPEN END Unlettered C-30

C-300Series is an updated version side door caboose with an enlarged freight door and end platforms. End platforms were added because of trainmen being injured while climbing out of side doors in front of passing trains.

BOX CARS TRUSS SIDE -HORIZONTAL

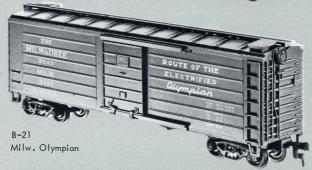

MODE

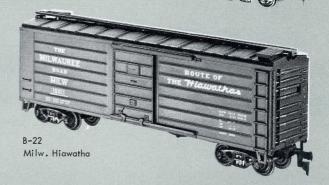

Truss side box cars go back many years in their origin, but are still very much in use on today's railroads. Look at any long string of cars and you will probably see several truss side cars in a variety of road names, for most railroad lines own cars of this style.

Horizontal Rib box cars are unique in design and are original with the Milwaukee Railroad. Properly, the reference should be Chicago, Milwaukee, St. Paul and Pacific Railroad Company. Freight equipment markings of C.M. St. P. & P. or The Milwaukee Road are found on the prototypes.

Unlettered 2 Window C-13

C-14

C-11 Pennsylvania

In addition to serving as a means of observation, the caboose is kitchen, bath and bedroom for your train's crew. Spare lanterns and other signal materials are carried here, and this is the conductor's office area.

First Time Anywhere

\$2.50 ea.

This Roundhouse model is a reproduction of the relatively light weight box cars in use on rail lines everywhere, carrying almost every type of lading from coast to coast. It is known as an AAR Standard 50 Ton 50 Foot Steel Sheathed, Wood Lined Box Car, and may be seen in several door sizes, from six to fifteen feet. Our model has a ten foot door.

Each box car in this new series has been selected for "on-line" eye appeal. Multi-colored paint schemes and/or striping are carried completely across the door so no gap is left to obstruct the beauty of these cars from one end to the other. Individually painted in six outstanding road colors and finely printed with correct herald and reporting data.

GONDOLA

\$2.00ea.

OVAL END GONDOLA

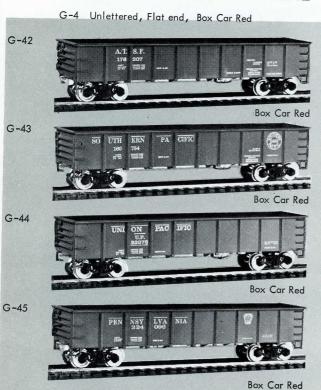

Here is an unusual Gondola with oval ends used by C&O in the days of yore. It's true to prototype and well detailed.

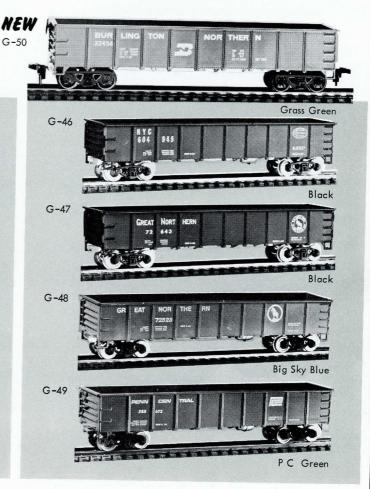

G-41 C&O Black

Designed for easy assembly. Molded in high impact styrene, factory painted and lettered. Complete with metal cast underframe, couplers and our super rolling trucks for trouble-free service.

Load these up with coal, iron ore, etc. for those long hauls. Remember, in the days of steam, it was a common sight to see as many as 200 of these gondolas rolling along the right-of-way.

FEATURING A COMPLETE LINE

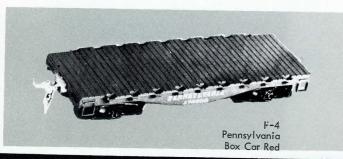

30 FLAT CARS

Here is an appealing little car that has a variety of uses. It is designed to carry compact, heavy loads. Cars of this type were used in tandem during World War 1 to carry guns. The kit includes side boards so that it can be used as a gondola. You will find this car useful around your industrial and mining

operations; also, it makes a good logging car. This car may look delicate, but with the metal cast underframe to give it weight and strength, it is a very rugged car that will roll and track superbly. Painted and lettered for Milwaukee and Pennsylvania.

'VARNISH" FROM THE "GOLDEN AGE" OF RAILROADING

Start collecting these elegant scale reproductions of yesteryear – four fabulous all wooden type Pullman Passenger Cars. Dining Car, Compartment Sleeper, Combination and the grand splendor of the Pullmans, a magnificent Observation Car. Prepainted one-piece molded body with separate attaching details – ventilators, tinted celestory window material, plus truss rods, queen posts, water and air tanks, etc. for complete undercarriage details. To finish your classic model, kit includes an easy to apply Gold Rub-on Transfer with several road names, car numbers, lines, scroll work and filigree for arch and oval windows. Trucks and couplers included.

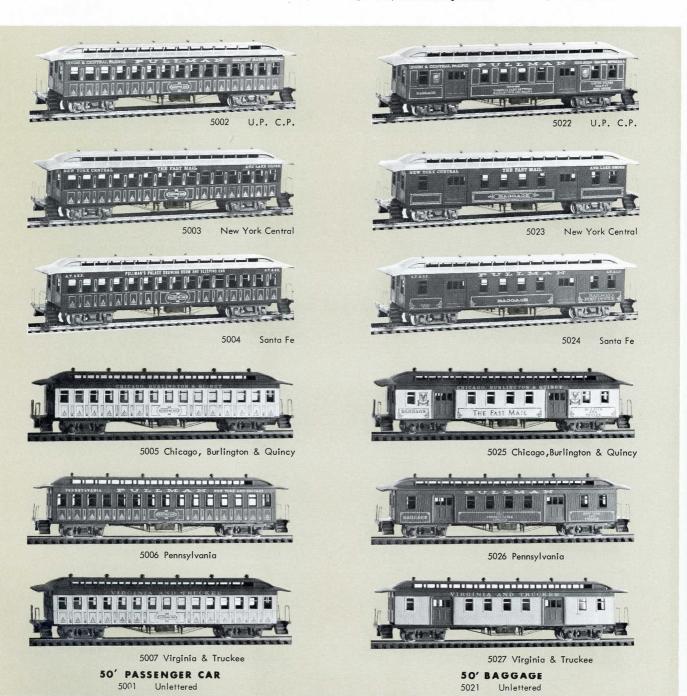

NEW'50' SLEEPING&BAGGAGE

PULLMAN'S PALACE CARS

With the completion of the transcontinental overland route; a new era in passenger travel was born, the "overnight Pullman sleeping car". This car was longer, higher, and wider than predecessors. Here first came the folding upper berth; two compartments at each end with eight sections, fully carpeted, french plush upholstery, finished in "varnish".

Roundhouse has re-created the 50' Pullman Coach and Baggage. Kits are engineered for home layouts or club, with long throw self centering toggle couplers, and all Delrin four wheel Pullman Trucks. Both style of car kits are pre-painted in matching two color combinations; printed with all appropriate lettering and scrolls. Body is a one piece molding with separate attaching hardware

New HARRIMAN Passenger Car Series

NOW---ROUNDHOUSE Products, the manufacture who produce only the finest in H-O Scale Model Railroad equipment, proudly presents the HARRIMAN style passenger car series. Each model in this new series is engineered from official Comman Standard Car Company blue prints, Circa 1910.

These beauties were designed for either your favorite "HI BALL" steamer or your modern diesel locomotive. Cars

are equipped with long throw toggle couplers for minimum radius home layouts or Hi Balling on your big club pike. 'Slickest' rolling trucks made! Scale Pullman 4 wheel trucks with NMRA wheel sets. Kits come complete with underbody detailing & separate attaching roof, for easy interior detailing. The finished body is attractivly painted in two colors, individually printed Kits operate with all H-O scale equipment.

50' EXPRESS REFRIGERATOR CARS

The express refrigerator cars were used in passenger trains to move perishable goods, which in most cases meant overnight delivery versus several days in regular freight service. This is a beautiful car, designed for easy assembly, with removable roof and underframe. Kit is complete with trucks and couplers, prepainted and lettered in popular road names. Operates on all HO scale railroads and is interchangeable with all other HO scale equipment.

H-0 SCALE Build with Roundhouse Products OLD TIMER BUILDINGS "TIME SAVER" KITS

New for '73, Roundhouse Products proudly presents our H-O Scale "Old Timer" building line.

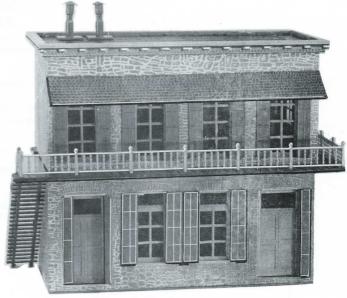

Roundhouse has always strived to bring to the model railroader the finest in H-O scale products and we are introducing a completely new line of H-O scale "Old Timer" buildings to supplement our growing railroad line.

The new Roundhouse building series represents a completely new consept in plastic molded kits. Each kit is built on a "Module", that is, all major components within each style, may be substituted without alternation, to achieve different buildings or unusual effects. Individual buildings may be stacked, one upon the other, or placed in any type of street scene.

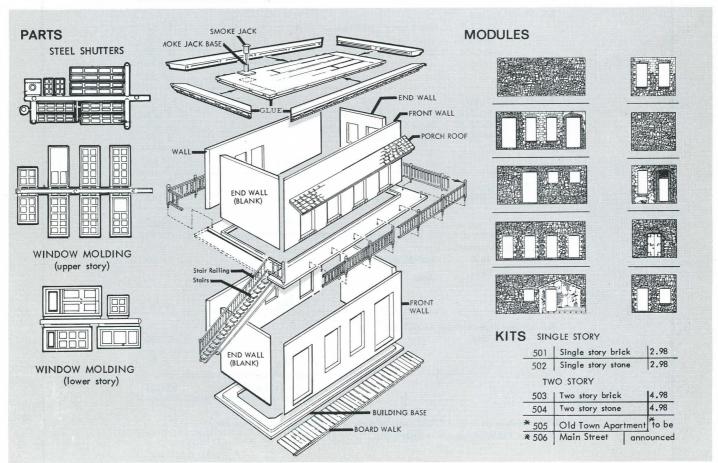

Parts are individually colored and the detailed stone and brick walls are prepainted with an authentic weathered appearance.

Also, to add greater flexibility to these new buildings, we are co-introducing a "Module Pack" deal consisting of separate bagged H–O scale parts to facilitate super detailing and add-ons.

- ■Injected multi-colored moldings
 - Modular construction
 - Ease of assembly
