Welcome to the exciting world of TOMAR and Utah Pacific Products.

Our lighted, distinctive drumhead kits are second to none, and we offer the largest variety of drumheads in the model railroad market. TOMAR's colorful drumheads are painstakingly reproduced from actual drumheads and photographs to give your passenger car fleet that special, authentic look. Or indulge your imagination and put a whimsical Santa on the tail-end of a Christmas extra for that special look.

While drumheads and TOMAR pickup shoes were long the mainstays in the line, that's no longer the case, as new products are being added to the line almost daily. Check out TOMAR's bumping posts, wheel stops, end-of-train device, minutely-crafted lineside signals and working grade crossing signals with operating gates.

And if you're looking for details to dress up one diesel locomotive or a fleet, you need look no further. The Utah Pacific line offers custom HO scale lost wax brass castings to individualize your rolling stock and right-of-way to give them that special look.

We at TOMAR and Utah Pacific are always looking for new railroad drumhead ideas or information on products of a general interest to model railroaders. Write to us with your ideas, and let us know what photos or drawings you can share. If the material can be used to produce an item not already included in our lines, we'll supply you with a kit of your choice, free of charge.

As always, TOMAR and Utah Pacific stand behind their products 100%. In the rare instance of a problem, please write or call so we can be of assistance to you with your modeling projects. We're here to help!

So take your time to browse through our newest catalog — it includes many new items which have not previously been listed. And remember, when you're looking for quality, you need look no further than the TOMAR and Utah Pacific labels. We're big on miniatures!

Marie and Duane Henry
Owners

Just a reminder

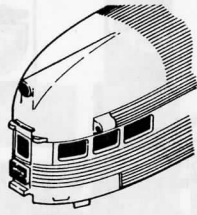

TOMAR Industries and Utah Pacific are open during normal business hours, Eastern Standard Time, and personnel are available to answer questions.

Phone: (616) 944-5129.
Fax: (616) 944-5129.

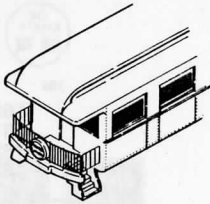

Address all correspondence, including a self-addressed, stamped envelope, to:

TOMAR Industries, 9520 E. Napier Ave., Benton Harbor, Mich. 49022.

TYPICAL APPLICATIONS

Rectangular housing mounted on stream-lined observation car.

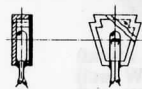

Round drumhead mounted on observation platform railings. (Also may use rectangular housing).

HW— Used on Heavyweight Trains (Older style heavy steel or wood cars)

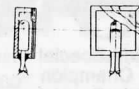

LW—Used on Lightweight Trains (New style lightweight streamlined cars)

HOUSING STYLES & SHAPES

PENNSY KEYSTONE

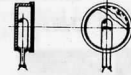

SQUARE

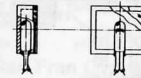

SHORT ROUND DRUMHEAD

Used on observation car railings, tailgates and streamlined cars.

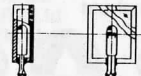

RECTANGULAR

(Horizontal mounting)
Used on all types of tail end cars.

RECTANGULAR

(Vertical mounting)
Used on all types of tail end cars.

LIGHTED DRUMHEAD KITS

TOMAR kits are complete with cast and machined housing to fit appropriate sign, 1.5 volt lamp for lighting tailsign, ballast lamp, full color train sign, light diffuser, four diodes, hook-up wire and complete instructions and illustrations.

BATTERY POWER HOOK-UP KIT

Battery not included

Kit can be used with HO and larger scales. Can be used in any application where 1.5 volts is required when battery power is preferred. Kit is ideal for powering the TOMAR DRUMHEAD KIT for battery use. Kit #812 can be substituted for the constant lighting parts in the drumhead kit; add an "X" to the catalog No. when ordering. Kit includes one AA battery holder and one micro-mini slide switch.

Kit No. 812

PRICES

TOMAR LIGHTED DRUMHEAD KITS:

"N" Scale	\$10.95	Double	\$16.95
"HO" Scale	\$ 9.45	Double	\$14.45
"S" Scale	\$10.45	Double	\$16.45
"O" Scale	\$10.95	Double	\$16.95
"G" Scale	\$21.95		

A DOUBLE DRUMHEAD KIT: A few passenger trains had two separate signs to grace the end of the observation cars. Examples: Kit #460 "Lehigh Valley" and Kit #530 "Texas Special." The double kit comes with 2 color signs, 2 film diffusers, 2 lamps, 2 housings for signs, 4 diodes, 1 ballast lamp and 1 piece of hookup wire.

If you prefer battery power over track power for the drumhead kits the constant lighting parts can be substituted with a battery power kit. This can be done by adding an "X" suffix to the catalog number.
