

# TIMBER BRIDGE PIER

## O GAUGE

ASSEMBLY INSTRUCTIONS  
for  
PIERS

READ CAREFULLY

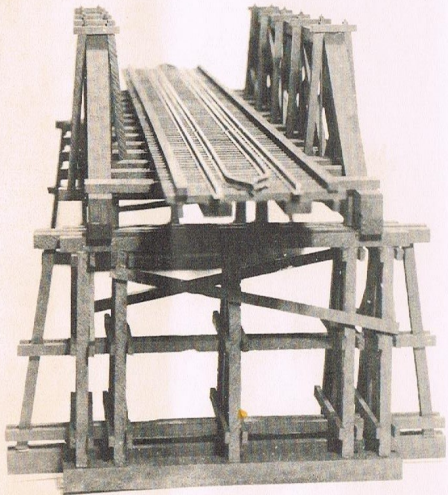

**Kit Number 6003**

1. Paint Parts L & L-1 White and let dry.
2. Place parts M & N on drawing and glue parts R, R-1 and R-2 in place. Set aside carefully and let dry. Repeat step 2 four (4) more times, making a total of five times. Then take the first section that was assembled and turn opposite side up on drawing. Repeat glueing of parts R, R-1 and R-2 five times as before.
3. Take two sections and cut and glue parts O in place.
4. Glue the five assemblies onto the parts L & L-1 as per drawing.
5. Glue parts P & P-1 in place as shown.
6. Glue parts K & K-1 in place as shown.
7. Glue parts S in place as shown.
8. Glue parts P-2 in place as shown.
9. Touch up glue marks etc., with dull FLAT BLACK PAINT.

If piers are to be used with our straining Beam Timber Span,  
glue span to piers with the Part I centered on the center of Piers.
