

IDEAL H-O GAUGE RAILWAY SYSTEM

DUMMY BLOCK SIGNAL

COPYRIGHT 1940 BY

IDEAL AEROPLANE & SUPPLY CO., INC.

NEW YORK CITY

Wm. Kramer Jr.

HOW TO BUILD THE IDEAL DUMMY BLOCK SIGNALS

1. Study the plan in order to familiarize yourself with the general assembly method.
2. Shape the wood parts as indicated. Taper the dowel posts and insert them in the wood, after first drilling holes to receive them.
3. Drill holes in the disc faces and cement the colored jewels in place. The Hoods are cut from tubing furnished in the set.
4. Bend the ladder as shown in the side view. Attach it and the staples to the base and upper wood section.
5. Paint the entire unit black. Then mount on the black platform.
